Our Office on the Rockville Pike

FOR the convenience of customers and visitors we have located our office and display grounds on the Rockville Pike, six miles north of the District line. To reach the office, drive out Wisconsin Avenue.

The main nursery is located one and one-half miles northeast of the office, in Rock Creek Valley, where the soil is ideal for the growth of fibrous-rooted evergreens, trees, and shrubs.

From our nurseries we can furnish landscape material peculiarly adapted to this territory. Many types and varieties of evergreens—Junipers, Cedars, Arborvitæ, Retinosporas, which are indispensable about the grounds—are grown in quantity. Here, too, you will find Hollies, Laurels, Rhododendrons, Abelias, and other Broad-leaved Evergreens in variety. Roses and flowering shrubs have a large part in our operations.

In addition to the planting material needed, we are prepared to furnish complete service in planting. To your own designer we offer complete facilities for building formal entrances, constructing roads, drives and paths, grading, filling, and other services needed to make home grounds, real estate developments, golf links, and parks of the greatest value to the owners and the general public.

If you will write or telephone us, we shall be glad to have our representative call on you, offer suggestions for improving your grounds, or discuss the plans you have in mind. If our suggestions please you, we shall be glad to accept your order for the material. If they do not, you will be under no obligations to us. Could anything be fairer? Awaiting your call, we are,

ROCK CREEK NURSERY, Rockville, Md.

Open for Business Daily, Except Sunday

Telephones: Kensington 99-R and 99-W

A HOUSE of this style, which partakes of the Dutch Colonial, seems to require a special type of planting around the foundation. Upright Junipers, Pyramidal Arborvitæ Retinosporas, and other evergreens of like habit are used to advantage. Shade is furnished by Maples on either side, and the hedge gives a sense of privacy. Modest in its cost, this little landscape plan adds a tidy sum to the actual value of the property.

Collection No. 1

Evergreens for doorway planting. Six strong specimens, $1\frac{1}{4}$ to $2\frac{1}{2}$ feet high, including 2 Globe-shaped Arborvitæ, 2 Pyramidal Arborvitæ, and 2 Japanese Yews, all for **\$19.50 delivered.**

AT THE right is shown the entrance to a much more pretentious home. The lines of the building are vertical rather than horizontal; because of this, evergreens of columnar habit prevail in the foundation plan. Vines over the doorway tend to unite both sides of the group, while the Boxwood and Globe-shaped Arborvitæ bring the color-line down to the lawn. Not an expensive plan but one that is extremely effective.

Collection No. 2

Evergreens for corner planting. Five strong specimens, $1\frac{1}{4}$ to $2\frac{1}{2}$ feet high, including 2 Pyramidal Arborvitæ, 2 Globe-shaped Arborvitæ, and 1 Pfizer Juniper, all for **\$15 delivered.**

LIKE guarding sentinels these two sheared Arborvitæ greet you as you approach this entrance. Specimens of Pfizer Juniper stand on either side of the steps and are flanked by Retinosporas, Junipers, and clipped Hemlocks. The angles of the architecture are softened, and a pleasing effect obtained at nominal cost for plans and plants. We shall be glad to offer equally satisfactory suggestions for your place.

Collection No. 3

Evergreens for a foundation planting or as a corner group. Six strong specimens, $1\frac{1}{4}$ to $2\frac{1}{2}$ feet high, including 2 Retinosporas, 2 Silver Retinosporas, 1 Globe-shaped Arborvitæ, 1 Pyramidal Arborvitæ, all for **\$20 delivered.**

OF ALL our native shrubs, Rhododendrons and Laurels are the loveliest. Fortunately, this territory is favorable to their growth and development. We are prepared to furnish these, and other Broad-leaved Evergreens, direct from the growing fields and at prices that will surprise you because of their modesty. If you are interested in Rhododendrons, Laurels, Abelias, Azaleas, Magnolias, Hollies, consult us.

Collection No. 4

Evergreens for a broad foundation planting, or can be divided and used on either side of the entrance. Ten strong specimens, in sizes from 1 to 2½ ft., for \$27.50 delivered.

IN OUR nurseries we grow a wide assortment of evergreens, shade trees, flowering shrubs, roses, and perennial plants. Our office, salesroom, and show gardens are located on the Rockville Pike. A large portion of our perennials, roses, and some shrubs are grown at this place. The main nursery is more than a mile distant from the office, and not on the highway; here, on level land, and on gentle slopes, we grow evergreens, shade trees, and other stocks. The two locations give us a distinct advantage in production, for it is an easy

matter to find a place where the plants will be thoroughly at home. They will thrive mightily during their "infancy" and be ready to do their best when transferred to your place. Moreover, the nursery is so near to the District that plants are seldom out of the ground more than twenty-four hours.

Collection No. 5

Low-growing evergreens, especially adapted for corner planting. Five strong specimens, 1½ to 2½ feet high, for \$15 delivered.

Flowering Shrubs for All Summer Bloom

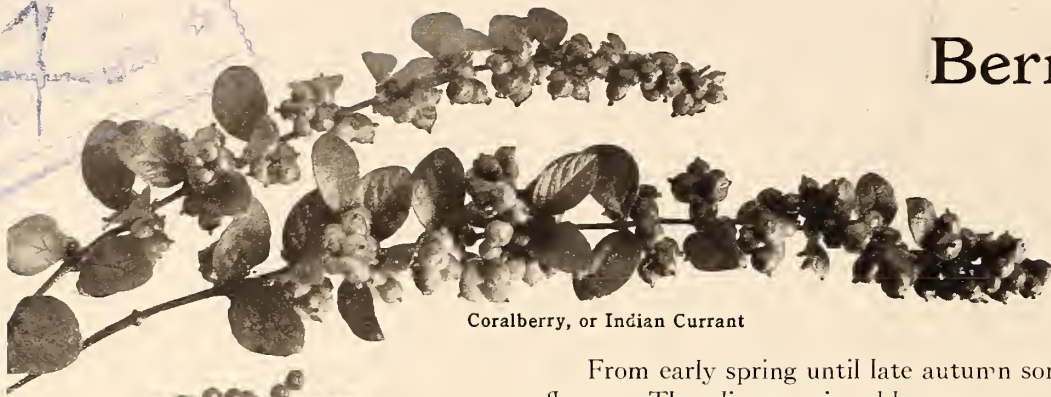

From early spring until midautumn some of the shrubs in this collection will be in flower. All the plants are covered by our guarantee which appears on the fourth page of this circular. Please remember that these are field-grown specimens, not less than three years old.

Golden Bell (Forsythia)

Spiræa, Anthony Waterer
Deutzia
Mockorange (Philadelphus)
Weigela rosea
Hydrangea Peegee
Hydrangea arborescens
Rose of Sharon (Althæa)
Crape Myrtle (Lagerstrœmia)

One plant of each (10 plants) for \$10 delivered

Berry-bearing Shrubs

Give Color During Winter and Furnish Food for Birds

Coralberry, or Indian Currant

From early spring until late autumn some of these shrubs will be in flower. The disappearing blooms are soon followed by brilliantly colored berries that will remain during the winter, and serve to attract birds to your garden.

Purple Callicarpa (*Callicarpa purpurea*). White flowers in August and September, followed by purple fruits.

Japanese Barberry (*Berberis Thunbergi*). Low-growing shrub with small foliage which turns to red in autumn. Scarlet fruits are attractive during entire winter.

Dwarf Juneberry (*Amelanchier*). White flowers in early spring, followed by purple colored fruit.

Chokeberry (*Aronia*). Flowers white in midsummer, followed by black fruits.

Coralberry (*Symphoricarpos*). Covered in midsummer with light red flowers; brilliant berries in autumn.

Snowberry (*Symphoricarpos racemosus*). White or pink flowers, followed by white berries which hang all winter.

Highbush Cranberry (*Viburnum opulus*). Scarlet berries which remain all winter follow the white flowers of early summer.

Arrowwood (*Viburnum dentatum*). Creamy white flowers in early summer with blue-black berries in autumn.

Bush Honeysuckle. White or yellowish flowers, followed by bright red berries which mature in early autumn.

Flowering Crabapple (*Malus niedzwetzkyana*). Red flowers in early spring. Both leaves and fruit turn to red in autumn.

Regel Privet (*Ligustrum regelianum*). Sprays of white flowers in midsummer, with black fruit in autumn.

One each of these 11 Berry-bearing Shrubs **\$10**
Strong, Field-grown Plants, delivered for

Hardy Plants for Every Garden

No home grounds and gardens are complete without an assortment of Perennial Plants. From our nursery we can furnish specimens suitable for general use in the vicinity of Washington. The assortment includes Peonies and Irises in choice varieties, Hardy Asters, Day Lilies (*Funkia*), Shasta Daisy, Delphiniums, Phlox, Aquilegia, Rudbeckia, Hibiscus (Mallow Marvels). This list does not by any means exhaust the varieties grown, but will simply suggest to you the wide range that can be secured at Rock Creek Nurseries.
